Subject: Bill10CourtChallenge.Org - Follow-up Report #16 – No Time for Complacency or Contentment

Dear Clergy

The attached PDF [see below] - *Follow-up Report #16 – No Time for Complacency or Contentment*, continues a chain of emails/notifications from Bill10CourtChallenge.Org to Alberta clergy, dating back to January 1, 2017. *Report #16* highlights key continuing concerns related to Bill 10 legislation impacting Alberta Education. Addressees may be surprised to know the April UCP election victory has not heralded remedy for crucial anti-Christian, anti-parenting, and anti-family legal and policy issues.

The *Report* is a six minute read.

Thank you for caring and for your time.

Peace and Grace in Christ.

Carman Bradley

Follow-up Report #16 – No Time for Complacency or Contentment

References:

- A. [Court Challenge Program \(CCP\) Application Against Issues in Bill 10, Bill 24, and Inclusive Education Policies](#) dated 21 April 2019.
- B. [Follow-up Report #15](#) dated 7 August 2019.

Clergy are asked to again review the case presented at Reference A (10 minute read), which highlights key concerns with Alberta's education-related legislations and policies. Note

Justice Centre for Constitutional Freedoms (JCCF), on 20 September 2019, released the [Update](#) that they have dropped the [Injunction Application](#) against Bill 24, claiming some successes with the UCP overturning Bill 24. However, truth is the original intent of Bill 10, i.e. no need to notify parents or seek parental approval for their children's GSA attendance or SOGI self-identity (ages 5-17) while at school, remains unchanged from 2015 law (see [Gordon Dirks](#)). In November 2017, UCP Leader Jason Kenney wrote in response to the NDP's Bill 24: *"We do not support, I repeat we do not support mandatory notification of parents regarding the involvement of students in GSAs."* *"And neither I nor anyone in our caucus has proposed "outing" gay kids."* *"Teachers, not politicians, should decide when it makes sense to engage parents."* His position has not changed with the UCP election victory.

The following is a letter sent to media last month, but never published. Addressees will find the read informative and thought provoking:

"There is no 'gay gene'," concludes the largest study on the genetic basis of same-sex attraction ([Science](#), 29 August 2019). The study's lead author, Dr. Andrea Ganna, a geneticist at the Broad Institute of MIT and Harvard, says at least 75% of sexual behavior can be explained by environmental/cultural factors. Public Health Agency of Canada agrees. In *Canadian Guidelines for Sexual Health Education*, the Agency writes: *"Sexuality is influenced by the interaction of biological, psychological, social, economic, political, cultural, ethical, legal, historical, religious, and spiritual factors."* Nonetheless, the UCP claim success for rescinding Bill 24, while leaving Bill 10 unaltered including policies like GSA attendance and SOGI self-identification, without parental knowledge/approval, while attending school (ages 5-17). More deceptive given the science, NDP MLAs and Edmonton City Councillors want a ban on so-called ["Conversion Therapy."](#)

Both UCP/NDP have disenfranchised parents of traditional childrearing rights/responsibilities and set in place unprecedented erosion of family autonomy vis-a-vis government. Both legislate on the unscientific premise that a child's self-declared sexual orientation/gender identity (LGBTQ...etc), at any age, is sacrosanct. The NDP assert SOGI is unchangeable. The UCP acquiesce to this "politically correct" position and hope to assuage concerns over child safety by proposing teachers be responsible for notification of parents in a health emergency arising from secret GSA attendance and/or SOGI self-identity. The strategy is flawed: (1) ATA membership (46,000) is dead set against the duty; (2) teachers often complain about class sizes limiting their ability to know students; (3) students move grades (K-12) and in higher grades between many teachers; (4) students switch schools and may move during a school year; (5) teachers are not trained/qualified/placed to make arbitrary and timely medical/psychological judgments on sexuality matters; (6) conflicting views regarding SOGI set one teacher against another; and (7) teachers don't know what is going on in GSAs.

Both parties disregard/disrespect the interests/rights of waverers – children questioning/confused/unsure about their developing sexuality. “Rainbow” Health Ontario found 3% of teens are waverers – youth who can develop along a heterosexual or homosexual path depending on “environmental/cultural factors.” Over 20,000 sexually wavering students (all ages) and other youths seeking heterosexuality cannot be abandoned to aspirations of SOGI extremists or to compromise policies of the UCP. The status quo insures: (1) increased sexuality confusion and health risks among youth; (2) secret separation of children from parental awareness/oversight/influence; (3) isolation of students for “exclusively” pro-LGBTQ indoctrination; (4) restricted access to heteronormative affirming counsel and medical support in schools; and (5) shifting sexuality “influence factors” in favour of celebrating/growing the LGBTQ community.

Furthermore, see letter-to-editor by John P. Nightingale: [MP should explain stance on conversion therapy](#), in the Lethbridge Herald, dated 9 October 2019. Specifically, note my comments on the conversion therapy issue found at second post in the blog responses.

Also of note are recent articles from Britain and the United Nations:

[BBC education film that claims there are 'more than 100 gender identities' is blasted as 'nonsense' and accused of 'confusing' primary school children](#)

[UN LGBT Czar Takes Aim Against Religions](#)

Action Request of Clergy

Please do not ignore the anti-Christian assault on religious freedom, parental rights and public education. Pastors are requested to earnestly raise these concerns with their church board, congregation, and district/denomination leadership to inform all and to prayerfully seek wisdom and discernment regarding defense of the Christian worldview.

Conclusion

The societal understandings of family (parenting children) and gender (biological sex) are being totally deconstructed in our generation. The province, whether under PC, NDP or UCP governance, now declares to know better than parents how to raise/develop our children’s

sexuality, starting as early as kindergarten at age five. The federal government (Liberals and NDP) [promise to ban](#) all counselling (medical or spiritual) aimed at promoting heterosexual attraction, and minimizing same-sex or bisexual attraction, and/or gender dysphoria.

Annually, there are over 628,000 Alberta youth (ages 5-17) in Public and Separate schools, not including Charter/Private schools and “home-schooling.” Based upon the 2011 Census, over half of these students are from Christian families. These socially conservative youth, parents, and their families, have been “[thrown under the bus](#)” by all parties in Alberta.

Peace and Grace in Christ.
